## BOOK SYNOPSIS

At Home with Autism: Designing Housing for the Spectrum introduces readers to conditions and aspirations of adults on the autism spectrum that demand a new approach to how we provide, locate, design and develop homes in which they live. The book argues that there is no singular stellar residential model, just as there is no singular prototype of autism. Grounded in an extensive array of research sources, the book identifies resident-focused quality of life goals, and profiles design guidelines directed to those goals. The book implores those involved in housing design, production and policy to expand their exposure to what is possible, what is desirable, and to direct their efforts towards expanding residential choices for those on the spectrum.
